PROFESSIONAL SUMMARY

RHCSA-certified Linux systems and production support professional with enterprise experience in RHEL/Linux administration, Ansible automation, Bash scripting, patching, deployments, performance troubleshooting, and infrastructure operations. Hands-on experience with Ansible Tower/playbooks, Git-based workflows, AWS, VMware, Docker/OpenShift, monitoring, and incident support. Strong foundation in TCP/IP, DNS, routing, firewalls, connectivity troubleshooting, and cross-team production problem resolution.

TECHNICAL SKILLS

Linux / Unix: RHEL, CentOS, Rocky Linux, Ubuntu; packages, users/groups, permissions, systemd, SSH, cron, logs, patching, services

Ansible / Automation: Ansible, Ansible Tower, playbooks, inventories, variables, modules, handlers, YAML, ad-hoc automation, configuration management

Scripting / Version Control: Bash/Shell scripting, Git, GitHub, Bitbucket; Python familiarity for operational automation

Networking / Security: TCP/IP, DNS, routing, default gateways, connectivity troubleshooting, firewalls, SELinux; load-balancer troubleshooting collaboration

Performance / Monitoring: top, vmstat, mpstat, iostat, sar, journalctl, syslog, Splunk, Dynatrace, SiteScope; CPU, memory, disk and service analysis

DevOps / Infrastructure: Jenkins, GitLab CI/CD, JFrog Artifactory, AWS, VMware ESXi, Docker, OpenShift/Kubernetes exposure, ServiceNow, Jira

PROFESSIONAL EXPERIENCE

Linux Application Support Admin | AMEX (American Express) | Sep 2024 - Present

- Support Linux-based production applications and infrastructure using Dynatrace, Splunk, SiteScope, Linux logs, and system diagnostic tools.
- Support Ansible Tower/playbook automation, Jenkins, Git/Bitbucket, JFrog, and OpenShift workflows for deployments, maintenance, and operational activities.
- Participate in Linux patching with automated pre-checks and post-checks; validate services and application health after maintenance.
- Troubleshoot production incidents involving services, CPU, memory, connectivity, deployments, and application behavior; coordinate resolution across technical teams.

Linux Unix System Admin | Wells Fargo | Sep 2022 - Aug 2024

- Administered and troubleshot enterprise Linux systems across services, logs, filesystems, LVM/storage, CPU, memory, and network connectivity.
- Used Linux performance and network diagnostics to identify bottlenecks and isolate infrastructure, application, and connectivity problems.
- Supported CI/CD deployments, configuration changes, post-deployment validation, and rollback coordination in production environments.
- Collaborated with development, database, network, load-balancer, Redis, and infrastructure teams during incidents and planned changes.

Linux Admin | AT&T Labs | Jan 2020 - Aug 2022

- Installed, configured, maintained, patched, and troubleshot RHEL/CentOS Linux servers across enterprise environments.
- Automated repeatable Linux administration and maintenance tasks using Bash and Ansible/Ansible Tower.
- Supported NFS, SELinux, firewall controls, NIC bonding, Linux networking, VMware ESXi, and AWS-hosted infrastructure.

Linux Technician | Halstead | Jan 2019 - Dec 2019

- Supported Dell PowerEdge and HP ProLiant systems using iDRAC/iLO, including hardware diagnostics, firmware, RAID, cabling, and bare-metal provisioning.

RELEVANT HANDS-ON AUTOMATION

- Build and troubleshoot Ansible labs covering inventories, SSH connectivity, ad-hoc commands, playbooks, variables, configuration changes, and multi-node automation.
- Hands-on AWX/Automation Controller learning includes inventories, credentials, projects, job templates, execution results, RBAC concepts, and operator-based deployment.
- Use Bash for Linux administration and automation; developing Python skills for operational scripting without claiming advanced Python expertise.

CERTIFICATIONS & EDUCATION

- Red Hat Certified System Administrator (RHCSA) - Certification ID: 250-104-395
- Bachelor of Science - International University
